St. Joseph School

Entering 5th Grade

Below is a list of skills from which a student may choose to work. Time should be spent wisely and you should focus on skills from the list that challenge you. Please also vary the skills you practice. **Please note that a 100 Smart Score is NOT required or even recommended**. Only the amount of time spent working in IXL will be assessed.

IXL does make changes to their skills periodically throughout the summer. While we are basing this list off the current IXL skill list, we are also "starring" each recommended skill online. This will allow students to know which skills they should focus on even if the list is not nearby or IXL changes the name or number of the skill during the summer.

Following are the requirements for this summer:

Grade Level	Based on 10 Weeks	Total Minutes Required
4th Grade (2017-2018)	20 Minutes Per Week	Total 3 Hours 20 Minutes

Recommended Skills List

A.12 Rounding
B.2 Add numbers up to millions word problems
C.1 Subtract numbers up to millions
D.18 Multiply two-digit number by two digit
E.4 Divide two digit by one digit
F.6 Multi-Step Word Problems
H.1 Input Output Tables
J.8 Create and Interpret Line Plot with Fractions
M.6 Making Change
N.1 Measure Using an Inch Ruler
P.10 Write Fractions in Lowest Terms
P.17 Compare Fractions
Q.9 Add and Subtract Fractions with Like Denominators
S.5 Multiply unit fractions by Whole Numbers
T.4 Place Values in Decimal Numbers
P.7 Equivalent Fractions
W.5 Parallel, Perpendicular and Intersecting Lines
BB.1 Perimeter
BB.5 Create Figures with a Given Area
P.17 Compare Fractions
